

Introducing Vantage™. Hands Down, the Best Hands-Free Helmet Light.

Bright blue tail light LED so you can be seen from behind

Rotates 360° on clamp

Long-lasting, long-running C4 LED is 2 – 3X brighter than previous LEDs

On/off switch is easy to operate even with heavy gloves

Attach or remove in seconds with no tools

Fits snugly against helmet to prevent snags

Ultra compact and lightweight (5.14 oz. with lithium batteries)

Vantage features revolutionary C4 LED technology. This new Photonic Crystal Technology combined with an innovative, Streamlight-engineered reflector makes C4 LEDs up to 3 X brighter than previous generation LEDs.

You've seen helmet lights before. But never anything like this. The new Vantage is ultra-bright. Thanks to C4 LED technology, it delivers 80

lumens. Its compact design fits snugly against your helmet. So it won't snag or get in the way. It clamps below or above your helmet brim in seconds. No tools needed. With its innovative lithium batteries, it's so light (just 5.14 oz.), you won't know it's there. And the bright blue safety tail light helps everyone see where you are, even in the thickest smoke.
