DUTY & UTILITY
LIGHTING SPECIALISTS

BECAUSE WORK IS TOUGH ENOUGH WITHOUT HAVING TO WORRY ABOUT YOUR LIGHTING.

Streamlight Stingers, Strions and SL lights are trusted by LEO, professional mechanics and tradesmen around the world for a simple reason... they’re the best.

With the performance and features that they need and the durability they can depend on.
This family of flashlights delivers the optimal balance of bright, far-reaching beam, ample peripheral light, and long run times. When you're out in the field or on any job that requires light for long periods, these are the flashlights you want by your side. Their brightness, power, performance, cost, and extended run times make them perfect for a variety of tasks.

**TRADITION SERIES**

**HPL SERIES**

These High Performance, High Lumen flashlights throw bright light a long distance. They have a bigger hot spot that casts more light on the target with more peripheral light. They’re great for illuminating the entire length of a dark alley, for any task that requires a far-reaching beam.

**HL SERIES**

These High Lumen flashlights have a wide, side-to-side beam. They illuminate an entire area, including what may be hiding in corners. They perform like floodlights, illuminating a whole room, vehicle, or any area with bright, revealing light.

**Far Reaching Beam + 1,100 Lumens... There’s a Reason It’s Called the Ultrastinger LED.**
THE STINGER SWITCHBLADE SPENDS AS MUCH TIME UNDER THE CAR, ON THE WALL, AND COVERED IN GREASE AS YOU DO. A PERFECT MATCH.
**STINGER SWITCHBLADE®**

Compact and extremely powerful, the Stinger Switchblade® rechargeable area light offers three (3) lighting options. The blade of the Switchblade can rotate 180° on the body. Soft detents will hold the blade in your desired position, and the light will stand on its tail with the light bar in any position. There are multiple ways to hook and hang the light. Use the hooks on the base plate or the retractable hook for many hanging options. The weighted base also includes magnets that will hold the light (in any orientation) to provide task-specific illumination.

LANTERN SERIES
FROM FIRST ON THE SCENE TO THE LAST ONE OUT OF THE TUNNEL, HEROES TRUST STREAMLIGHT.

Lanterns are part of our history and part of our future. In 1973, Streamlight pioneered portable lighting with our million candlepower SL and for the past 45+ years we continue to forge new ways to provide light where it’s needed.
PORTABLE SCENE LIGHT

The Portable Scene Light provides rapid deployment on site, and it goes anywhere. With its 90° swivel neck, it’s easy to shine light into the most out-of-the-way place. The head extends to 72” within seconds. It provides 3 levels of lighting and substantial run time to last through several shifts, even days. The unique diffuser lets you select a flood or spot beam in all three levels. It’s designed to adapt to tight spaces, but rugged enough to be stable in wide open terrain or steps. The regulated light provides consistent output throughout the life of the battery. It’s an indispensable tool for first responders, construction crews, and utility workers.

PORTABLE SCENE LIGHT
BATTERY: Zero-maintenance, sealed lead acid. Can also be powered by 12V DC power cord.

**WAYPOINT®**

This long-distance, pistol-grip lantern is the light you need to inspect a power line from the ground, find a dock from the interior of a lake or to see whatever is way up ahead. Its beam reaches about the length of 6 football fields! It also has plenty of peripheral light, so you can see what's all around you. Set it down to illuminate an entire area or aim it to check on trees or power lines far away. Features 3 modes including a strobe for signaling.

**WAYPOINT**

**BATTERY:** 4 "C" batteries (not included).
Can also be powered by 12V DC power cord (included)

### WAYPOINT RECHARGEABLE

The rechargeable model has a broader, wider beam than the alkaline Waypoint. It spreads bright light across a whole room, campsite or backyard illuminating everything, yet its beam still reaches an impressive 678 meters. IPX8 rated design waterproof to 2 meters. Light floats if dropped in water. Includes 3 modes: low, medium and high. With its integrated stand you can set it up for easy area illumination. Fully recharges in 4 hours.

The Dualie Waypoint® light offers dual light technology with a forward facing spot beam and a bottom facing flood light that can be used individually or at the same time. See what’s ahead of you and right in front of your feet with the Dualie Waypoint. Its bright light, which shines both ahead of you and downward, helps you avoid slips, trips and falls. Multiple hands-free uses - hang it over a door, stand it on its kickstand or hang it with integrated D-ring. The ergonomic handle hooks over any door, pipe, bar, cable or ladder rung for hands free operation. It also includes and integrated stand to make the light perfect for any lighting need. The light is sealed and floats, so it’s great for wet applications.

SUPER SIEGE® RECHARGEABLE LANTERN

The Super Siege® Lantern features five LEDs, one white and four red with six output modes and a battery level indicator built into the on/off button. A rechargeable lithium ion battery supplies the power for the lantern as well as enabling you to recharge all your electronic devices from the handy USB port. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D-ring for large area lighting needs. Utilize the included “Glare Guard” to shield light from 1/2 the globe, allowing you to direct light on your work zone. A small storage area is provided in the base of the light for all your “keep dry” needs. Simply rotate the bottom cover counter clock wise to remove and access the storage compartment.

THE SIEGE® LANTERN

The Siege is brighter, more durable, and much more versatile than other emergency/camping lanterns. It’s bright enough to light up a whole campsite. It runs for over 30 hours on high, and over 12 days on low! Its handle and D-ring allow you to hang it or clip it almost anywhere, upright or inverted. It has 3 white light settings, a red light for softer, less intense light, and an SOS mode. Remove the top for brighter light. Battery indicator flashes to alert you to low battery.

SURVIVOR®

The leading Class I, Div. 1 right angle, clip-on flashlight features a slim profile and a dependable clip/hook for more accurate light orientation. 4 lighting modes include high, low, flash, and a moonlight mode for low-level lighting that lasts for 20 days. Spring-loaded clip easily attaches to belts and harnesses. Comes with two special, interchangeable Smoke Cutter® plugs that help create your preferred beam pattern: Black plug significantly reduces peripheral light for a tighter beam while the Amber plug reduces peripheral light and eye fatigue caused by glare. Available in alkaline and rechargeable models.

All openings are O-ring sealed for weather-resistance. IPX4 rated water-resistant. 2 meter impact resistance tested. Unbreakable, scratch-resistant polycarbonate lens. Designed for easy operation even with heavy gloves.

VANTAGE® 180 X

This multi-fuel, multi-function light is the most versatile rechargeable firefighter’s light. It’s a helmet mounted light, right angle light and a hand-held flashlight. The Vantage 180 X USB is a rechargeable system that comes with a new 18650 USB battery with integrated USB charging port. The Vantage 180 X comes with two CR123 batteries. Easily attaches above or below the brim of most helmets providing a bright main white LED and blue safety taillight. Quickly detaches for hand-held and clip-on right angle light with white taillight and downcast light to see what’s at your feet. IPX7 waterproof.

- Head articulates 180° to aim the beam.
- Use as a helmet light. Easily attaches above or below brim. No tools necessary to quickly remove for use as a hand-held flashlight.
- Rear LED Taillight changes from blue to white:
  - Blue LED for helmet mount use and visibility in heavy smoke
  - White LED for a downcast flood light to see what’s at your feet; switches from blue when head is at a 90° angle
- Includes “quick release” helmet bracket and hex key.

SAFETY-RATED LIGHTING
BECAUSE YOU DON’T GET TO CHOOSE WHERE IT’S GOING TO BE DARK.

Streamlight builds more safety-rated lights to give you more options in hazardous locations. With our comprehensive product line of Dualies, ProPolymers, Knuckleheads and headlamps — you have a full selection of safety-rated lights no matter your lighting need... right-angle, wearable or with laser pointing options.
The National Electric Code (NEC) defines hazardous locations by “class” and “division.” There are three classes:

**CLASS I** locations are made hazardous by the presence of flammable gases, liquids or vapors.

**CLASS II** locations are hazardous because combustible dusts are present.

**CLASS III** locations contain easily ignitable fibers or flyings.

The “Division” designation refers to the likelihood that ignitable concentrations of flammable materials are present. There are two divisions:

**DIVISION 1** designates an environment where ignitable concentrations of flammable gases, liquids, vapors or dusts can exist some of the time or all of the time under normal operating conditions, or where easily ignitable fibers and flyings are manufactured, handled or used.

**DIVISION 2** locations are where ignitable concentrations are not likely to exist under normal operating conditions or where Class 3 materials are stored or handled.

Hazardous classes are further defined by “groups” based on the physical properties of their combustible materials. These groups include (but are not limited to):

**GROUP A** Acetylene

**GROUP B** Hydrogen

**GROUP C** Ethylene, carbon monoxide

**GROUP D** Propane, gasoline, naphtha, benzene, butane, ethyl alcohol, acetone, methane

**GROUP E** Metals including aluminum, magnesium (Div. 1 only)

**GROUP F** Carbonaceous dusts including coal, carbon black, coke

**GROUP G** Dusts not included in E and F including wood, plastics, flour, starch or grain dusts

DIFFERENT LIGHTS FOR DIFFERENT HAZARDOUS LOCATIONS.
WHY ARE SAFETY RATINGS IMPORTANT?

There are several types of locations in which it can be extremely dangerous to use any light that has not been specifically designed — and approved — for that kind of location. These are areas where fire or explosion hazards may exist due to the presence of flammable gases, liquids, vapors, dusts, or ignitable fibers or flyings. If you will be using a flashlight in any potentially hazardous location, it is critical that your light be safety-rated for that specific kind of environment.

ATEX RATINGS

Streamlight also offers safety-rated lights that comply with the European Union (EU) Directive 2014/34/EU (ATEX) for products intended for use in potentially explosive atmospheres within the EU member countries. Please visit our website, streamlight.com for more information on ATEX-rated products. We also have a catalog of ATEX-rated products available upon request.
The Dualie design allows you to see what’s ahead of you and right in front of your feet. Its bright light, which shines both ahead of you and downward, helps you avoid slips, trips and falls.

The Dualie Laser features a simultaneous spot beam and laser pointer allowing you to illuminate the work area and pinpoint out-of-reach objects.

69420 TLR-7 with rail locating keys and CR123A lithium battery - Box - Black

Safe Off feature prevents accidental activation; saves batteries.
This family of flashlights delivers the optimal balance of bright, far-reaching beam, ample peripheral light, and long run times. When you’re out in the field or on any job that requires light for long periods, these are the flashlights you want by your side. Their brightness, power, performance, cost, and extended run times make them perfect for a variety of tasks.

**TRACTION SERIES**

These High Performance, High Lumen flashlights throw bright light a long distance. They have a bigger hot spot that casts more light on the target with more peripheral light. They’re great for illuminating the entire length of a dark alley, for any task that requires a far-reaching beam.

**HL SERIES**

These High Lumen flashlights have a wide, side-to-side beam. They illuminate an entire area, including what may be hiding in corners. They perform like floodlights, illuminating a whole room, vehicle, or any area with bright, revealing light.

**Ambidexterous momentary steady-on-off switch**

This combination bright white LED and infrared (IR) illuminator is designed for use with a pistol. It has a lower profile than the original TLR-VIR, and it’s waterproof to 66 ft for 2 hours in its standard configuration. The IR illuminator is within the same lens as the white light. You can easily transition from white light to IR with a switch at the bottom of the light. There’s no need to remove your eyes from the target or alter your firing grip. It has the standard momentary and constant-on ambidextrous switch as well.

18650 CHARGER KIT

18650 Lithium-Ion batteries provide an alternate power source for newer Streamlight products that accept either standard CR123A lithium batteries or 18650 batteries. The two bay 18650 battery charger can recharge one 18650 battery in as little as 3.5 hours, or two batteries in as little as 6.5 hours. The charger features dual input power sources, accepting either 5V USB power or traditional AC or 12V DC power sources. Dual input power sources provide a wide variety of battery charging options when a wall outlet is not available, such as a PC, power pack or 12V DC automotive power. Models available with charger, two 18650 batteries and either a 120V AC/micro-USB adapter or custom micro-USB cord.

REDEFINING PORTABLE LIGHTING

YOUR JOB HAS CHANGED, BUT THE NEED FOR SMALL, VERSATILE AND EFFECTIVE LIGHTING HASN’T.

We pride ourselves on identifying a need and building a product to suit it. Our Stylus is exactly one of those products. Small, compact, a long runtime and easily stowed. It’s been seen just about everywhere from garages to TSA lanes. It’s evolved into a full family of Stylus products with unique attributes that make them extra functional and suited for a variety of tasks. Same with our namesake Twin-Task and Task-light lines.

By purchasing this product, you are helping to make a difference in the rebuilding of the lives of surviving families and affected co-workers of law enforcement officers killed in the line of duty. In addition to rebuilding lives, C.O.P.S. (Concerns of Police Survivors) provides training to law enforcement agencies on survivor victimization issues and educates the public of the need to support the law enforcement profession and its survivors. For more information, visit www.ncops.org.

The Breast Cancer Research Foundation® is an independent 501 (c) (3) not-for-profit organization whose mission is to advance the world’s most promising research to eradicate breast cancer in our lifetime. For more information, visit www.bcrfcure.org.

Congress created the National Fallen Firefighters Foundation to lead a nationwide effort to honor America’s fallen firefighters. Since 1992, the non-profit foundation has developed and expanded programs that fulfill that mandate. Their mission is to honor and remember America’s fallen fire heroes and to provide resources to assist their survivors in rebuilding their lives. For more information, visit www.firehero.org.

**SIEGE® AA LANTERN**

The Siege® AA lantern features one white LED, and two red LEDs [or two blue LEDs on the C.O.P.S. model]. There are five output modes and a battery level indicator built into the on/off button. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D ring for large area lighting needs. Battery replacement is a breeze with the center post orienting the battery cover correctly every time.
