Subject: COVID-19 Update and Business Continuity

As a life sustaining business and a critical infrastructure supplier to the Military, Federal Government, Law Enforcement, Fire Service, Automotive Repair and Industrial/Energy markets, Streamlight continues to maintain operations at our Eagleville, PA manufacturing facility with only essential operations employees on site. Employees that are able to perform their duties remotely, will continue to do so for the foreseeable future.

For the health and safety of our employees, Streamlight implemented a COVID-19 CDC Compliance Plan which includes the following guidelines:

- Maintaining a healthy and clean business operation and work environment
- Screening of employees and approved visitors for COVID-19 symptoms prior to building entry
- Education on proper social distancing practices in the workplace
- Education on reducing transmission of COVID-19 among employees
- Travel restriction guidelines for all employees
- Procedures for occurrence of having a sick employee
- Education for employees on reducing the spread of COVID-19
- Guidance on appropriate meeting and gathering protocol

Our manufacturing and shipping operations along with customer service are working to maintain business continuity. There have been minimal disruptions to our supply chain as our materials management team has continued to work closely with all suppliers to maintain flow of shipments and inventory levels.

Based on our modified work practices, we do anticipate some potential lead time extensions. Please touch base with our Inside Sales Team at 1-800-523-7488, or 1-610-631-0600 for information on product availability and lead times.

We appreciate your continued confidence in Streamlight.
