

STREAM LITE — 1 MILLION™

Bulletin No. 102

1,000,000 Candlepower

- XENON PORTABLE SEARCHLIGHT
- INCREASES SURVEILLANCE CAPABILITIES
- TRUE COLOR RENDITION AT MORE THAN 500 YARDS
- NON-LETHAL DEFENSIVE WEAPON (OBSERVATION WITHOUT INTIMIDATION)
- OPERATES FROM A POWER PACK, OR AUTO OR BOAT ELECTRICAL SYSTEM
- LIGHT WEIGHT, COMPACT

U.S. Patents D-234,001
3,922,584

STREAM LITE 1 MILLION, the world's most powerful handheld searchlight, is now available for security, surveillance, and other commercial and industrial applications. This small, light-weight searchlight produces an intense beam of one million candle power—fifty times brighter than an automobile headlight—brighter than the landing lights of a "747" aircraft.

STREAM LITE 1 MILLION uses a powerful xenon-arc lamp in a highly efficient reflector to produce an intense "sun-like" beam of white light. With its narrow beam the STREAM LITE 1 MILLION is capable of illuminating targets at distances of more than a mile. The color spectrum of its light beam provides true color rendition and excellent target identification.

These features make the STREAM LITE 1 MILLION ideally suited for particular far reaching applications in law enforcement, search, surveillance, navigation, rescue, inspection, non-lethal defense, and various industrial applications.
