EXTREME WEATHER brings with it unpredictability and the necessity to plan for emergencies. Portable lighting systems offer an advantage when it becomes necessary to move about a facility to power down or disconnect critical equipment, retrieve sensitive documents, or guide employees through remote areas that lack adequate backup lighting.

EMERGENCY PREPAREDNESS is a continual process. This is why Streamlight has created this guide to help you in identifying the most common torches used before, during and after a storm or natural disaster.

ARE YOU PREPARED?
